Royal Institution
3 Feby 1840

My dear Sir –

Have you, or can you procure for me a specimen of Amygdalin? or can you tell me whether any one here has examined it and successfully repeated the curious experiment of Robiquet and Boutron Chalard[2]. or, if you have obtained Amygdalin yourself, will you tell me whether you got it from Bitter-almond cake / after the oil has been expressed / by the action of alcohol and Ether, as recommended by Robiquet.

Yours faithfully

W. T. Brande.

Sir. Thomas Acland Bart
